

Kings Park Tree Trail: Celebrating Urban Champions of the Present and Future

Join us in admiring and understanding more about a selection of our incredible Western Australian tree species on this special tree trail.

By safeguarding and planting native trees we're working towards strengthening and improving our important urban canopy. This creates a cooler environment, provides habitat & food for fauna and shade & shelter for all.

This trail includes just a small selection of our wonderful Western Australian trees. For further inspiration why not explore: **the Eucalyptus Garden, Naturescape & surrounds or our other Botanic Garden collections.**

Kings Park & Botanic Garden, connecting community with canopy. We're in this together.
